

# OTScreenRec - M4L device

By NINETEEN95STUDIO

## Overview

OTScreenRec can capture Ableton live's screen and audio streaming.

You can just capture monster screen and audio streaming by using this Max for live device.

[#m4l](#) [#screenCapture](#) [#utils](#)

## How to install

- You need Ableton live and Max for live
- Move folder to max for live search path. (Ex. /Users/XXXXXX/Music/Ableton/User Library/Presets/Audio Effects/Max Audio Effect/)( Mac OSX)
- move these files
  - OTScreenRec.amxd

## How to USE?

- 1) Insert The OTScreenRec.amxd on audio track. (Recommend Master Track.)
- 2) You can watch 6 steps as block.
  - 1) Start engine // Start Capture instance
  - 2) Set Monitor // (If you use multi-display)
  - 3) Check Audio Level // You can set Recording audio level.
  - 4) Set Output Path // set Save file folder. Exported separating movie and audio files.
  - 5) Ready & Go! // Start and Stop Recording.
  - 6) Combine movie(optional) // Combine movie and audio file(You NEED install [ffmpeg](#)) or You have to use Movie Editor such as iMovie or PremierePro, Davinci Resolve.
- 3) If you finished recoding, you can stop screen capture by using step(1)'s Start Engine button.
